

# Flexco REAL-TIME CONCEPT

## REAL-TIME INFORMATICS

Informatics™ is a tool that in real-time analyzes information as entered during inspection or self inspection and audits, you can during the inspection align on strategic scopes, problem solving, and results and report are generated automatically. Informatics™ helps you understand deviations through the engagement and enables you to take immediate action in real-time.

## A LEAPFROG PROGRESS

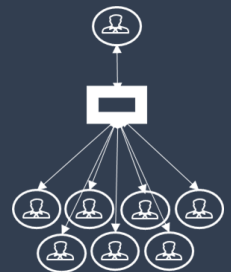

- Engage unlimited suppliers in real-time and convert feedback into insights
- Stay focused on strategic aims
- Ensure right topics are addressed during inspection and final audit reports
- Simplify assessment, protocol or checklist
- Blueprint creates more value with an easy interface and gains insight into suppliers, vendors and partners

## WHAT MORE DO YOU GET OUT OF IT?

- Easily connect with new suppliers, vendors, and partners.
- Easy interface and Dashboard allows you to act and adjust while saving time
- Ensure that the right topics and issues are addressed
